[illegible]

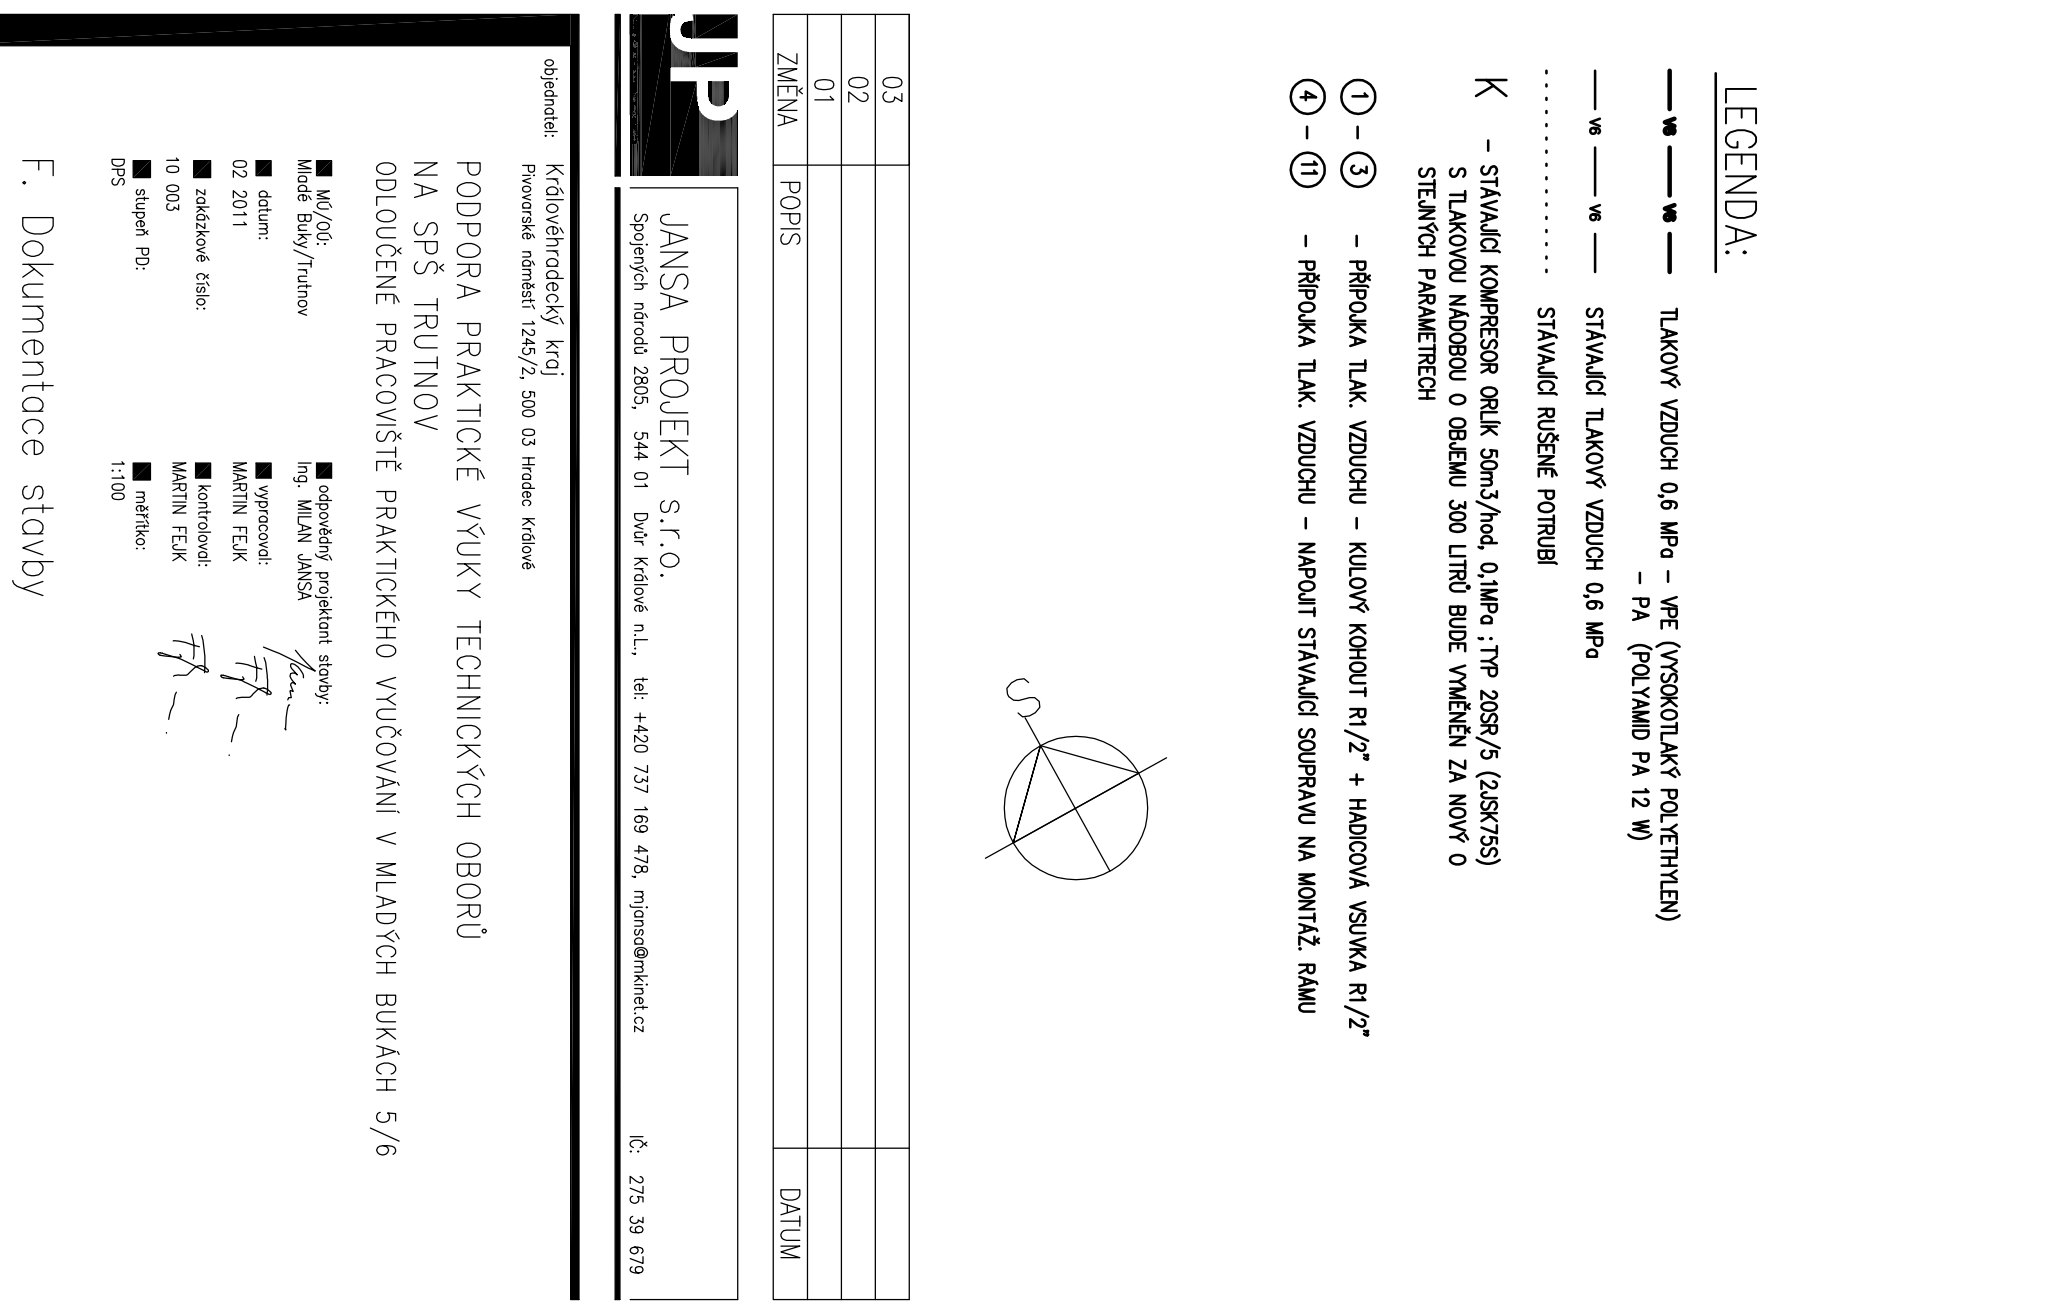

**CONCLUSIONS** The authors have shown that the use of a modified, simplified, and standardized questionnaire for the assessment of the health status of the population is possible. The questionnaire is not too complicated and is not too expensive. It is possible to use it in the future for the assessment of the health status of the population in other countries. The questionnaire is not too complicated and is not too expensive. It is possible to use it in the future for the assessment of the health status of the population in other countries.
